

ACTIVITY

INDIVIDUALLY

Imagine you could see your neighbourhood, village or town from the sky. What would you like others to see? It could be something far away from where you live, or your own neighbourhood, it's up to you.

Make a drawing of it and explain why you want to illustrate this place, and **what it means to you**.

IN YOUR TAPORI GROUP

Take time to see the places the members of your group have chosen and how they have chosen to represent them. And now think about your group, the place where you meet, and where you live.

If we could see you from the sky, **what would you want us to see?** And above all, if together you did something to improve your environment, what would you do?

Once you agree on this, using recycled materials, try to make a **3D model** where we can see what you have chosen to represent.

Don't forget that we'll be able to see you from the sky!
